SPECIAL THANKS FOR A GREAT INITIATIVE

Problem:- Currently we have around 3K URL's on wasalt throwing HTTP 404 Error. How to test all the URL's is the major problem ?

Solution:- **Vikas Kumar from QA team**, has automated the process, where the code will be able to identify all the 404 errors and the result will be saved in a csv.

Manual Effort:- (16+hrs)

Manually it is impossible to test all the URL's, and hence it gonna take more than 16+hrs (2days) atleast to test the same

Automation Effort (4hrs)

Via automation we will be able to complete this exercise is less than 4hrs
